This special hourglass is like magic!

An illusion element that grabs the children's attention with its coloured liquids. They can watch and turn over again and again. With this kind of „hourglass“, the children get their first feeling for time. It helps the children to concentrate and come to rest. They watch the movements of the colour drops.

Set-up: The hourglass is attached to the plate.

Game Idea: The children turn the hourglass and watch how the liquid moves. Here the children get a first feeling for time. In the time, the children can also perform tasks that they set for each other, for example hopping on one leg or much more.

Educational Areas: Communication, first feeling for time, encourage motor senses.

Tip: Give the children tasks to do while the liquid is passing through. For example: „Look for a red object, hop on one leg...“ and much more.

ACTIVITY HOUR!

Together with the children invent tasks around the topic of „time“.
