

# BILLY BEE

\* helps to protect species.

SAVE  
OUR  
PLANET

**Category:** insects

**Typical feature:** yellow-black striped body

**Habitat:** meadow, forest, garden

**Favourite food:** nectar, pollen

**Hobbies:** making honey

**My greatest wish:** a meadow with lots of colourful flowers

## BILLY IS WORRIED

Not so long ago, Billy Bee lived in a colourful meadow of flowers. Billy Bee watched anxiously as the idyll of her home became more and more spoilt with each passing day. But Billy is not giving up. "The solution lies in working together", she hums. From flower to flower, she spreads the message about the importance of species diversity and biodiversity. Billy raises awareness of the importance of protecting nature and preserving diversity for future generations.

# WANDA RACCOON

\* is a real everyday hero.

SAVE  
OUR  
PLANET

**Category:** mammals

**Typical feature:** black stripe around the eyes, striped tail

**Habitat:** forest, city outskirts

**Favourite food:** everything

**Hobbies:** climbing, searching attics and bins for food

**My greatest wish:** that not so much food is thrown away

## WANDA KEEPS FINDING WASTE

It is not until it gets dark outside that Wanda Raccoon starts her search for food. However, Wanda often comes across waste that has not been disposed of properly. She is therefore committed to consciously separating waste. With her skilful paws, Wanda separates plastic, paper, residual waste and other waste and sorts it into the correct bins. She keeps her environment clean and thus helps to place the waste into the recycling cycle. Even small hands can accomplish great deeds.

# PAUL PENGUIN

\* stands up against global warming.

SAVE  
OUR  
PLANET

**Category:** birds

**Typical feature:** black and white tailcoat

**Habitat:** coastal waters of the southern hemisphere

**Favourite food:** fish, crabs, squid

**Hobbies:** waddling, swimming and diving

**My greatest wish:** large ice floats that do not melt

STOP  
GLOBAL  
WARMING

## PAUL WILL NOT BE DISCOURAGED

On the icy shores of the southern hemisphere is where Paul Penguin lives. Even though he may not be able to fly, he is an outstanding swimmer. But as the oceans continue to warm up, the fish and marine animals, which are on the menu for penguins, are moving into deeper waters and further away from land. Paul is not losing heart despite this. Together with his penguin friends, he finds a sustainable way to collect food without hurting the sensitive ecosystems. Everybody has the opportunity to set change into motion.

# FOXY FOX

\* saves the forest.

SAVE  
OUR  
PLANET

**Category:** mammals

**Typical feature:** reddish-brown fur and bushy tail

**Habitat:** forest, city outskirts

**Favourite food:** small wild animals and fruits

**Hobbies:** digging underground burrows

**My greatest wish:** that the forest is doing well

SAVE  
THE  
FOREST

## FOXY CAME UP WITH A PLAN

In a deep forest, between thick trees and bushes, is where Foxy Fox lives. Foxy knows all animals and plants in his environment and observes their behaviour closely. No wonder the saying goes that foxes are very clever. Foxy came up with a plan to protect the forest as a diverse habitat. Over time, the changes to protect the forest become visible: The forest recovers and becomes resistant.

# TINA TURTLE

\* protects the oceans.

**Category:** reptiles

**Typical feature:** hard shell, long neck

**Habitat:** forests, deserts, swamps, rivers, oceans

**Favourite food:** grasses, insects, jellyfish, squids

**Hobbies:** basking in the sun

**My greatest wish:** a biodiverse ocean without waste

SAVE  
THE  
OCEAN

## TINA WARNS THE MARINE ANIMALS

Sea turtles like Tina Turtle spend their entire lives travelling. She travels many kilometres a day and observes how waste spreads in the ocean. Waste such as plastic bags and old fishing nets threaten not only Tina and her fellow turtles but also all other animals. Tina thus decides to warn the marine animals. On her travels, she also teaches people how urgent it is to protect the environment. Her efforts soon reduce the amount of waste and the habitat in the oceans recovers.
